Profile

Creative and driven individual who is passionate, curious and excited by new technologies, I'm currently working as a developer creating digital solutions for corporate, as well as leading charity clients. I am a fast learner with attention to detail as well as great interpersonal skills and a relaxed temperament.

Skills Summary

- HTML5, CSS3, JavaScript (ES6), jQuery, Wordpress (LEMP Stack), Linux
- Basic Node.js, Express, React
- Webpack, Gulp, Laravel Mix
- Git, Bitbucket

Employment summary

October 2017 – present | **Permanent Role**

Web Developer at [Carr Kamasa Design](#)

Location: London

Role:

I work as part of a small team and create bespoke WordPress websites / applications for a variety of clients. Duties include, translating designs to pixel perfect code following best practises, creating interactive reusable components, website maintenance, CMS client training.

Technologies used: HTML5, CSS3 / Sass, JavaScript (ES6) / jQuery, WordPress Roots Stack and Laravel Blade templating, WP REST API, Webpack, PHP 7, Adobe Suite

July – August 2017 | **4-week Contract**

Junior Front-End Developer at [Discover Brand Creation](#)

Location: London

Role:

Worked as part of a multi-disciplinary team, during the last 4 sprints (1 week each) of a team-communication app's redesign. The client had their existing web-app redesigned as they decided to migrate it to NW.js. Our team's task was to translate the client's designs into
